

# Outdoor Learning – 20<sup>th</sup> February

## Spring in the Air

Our week started with a big old dig at Shalfleet. Everyone helped to clear the weeds and turn the soil over. We found so many worms! Look what a difference we made – it was ready for Y6 to plant some garlic.

Best of all, we found some treasure lurking under the soil. We are looking forward to a potato feast!

When you stop to look, there are so many signs that spring is on the way. You'd be surprised how many signs of plant, insect and animal life we found around our school grounds.

What do you think nibbled this nut?

Look very closely and you will spot an ant and some eggs!

At our new school site in Freshwater, we are making the most of our muddy field to spot animal tracks. We are trying to make casts so we can study them closely. We noticed a den, too and using wildlife guides, we have put the evidence together and think there may be a fox living in our field. So we carefully positioned our wildlife camera to pick up any fox action – stay tuned for the next exciting installment!

Yarmouth

KS2 enjoyed a walk back to school after the pancake races and look who came to greet us at the causeway.

There is always plenty to do and we never waste opportunities to practise writing, build with our friends, create imaginative recipes, games and art.

The world around us is endlessly fascinating and we are constantly amazed by the tricks for survival different creatures have evolved. Watch this video – can you guess what will happen?
