

# Outdoor Learning Autumn 1

Here we are again!

What amazing weather we had this week! We were so excited to rediscover all our gardens have to offer.

How many different ways do you think there are to build a marble run? We are still searching for the answer. With a few bits and bobs, it's amazing what else we can build - a castle, a bughouse, an adventure trail and special machines. We can also make up games and find ways to stay cool and relax.

At Yarmouth, we found some treasure still growing in the garden - some beans, some carrots, some potatoes and a giant sunflower!

We cooked some delicious food in our mud kitchen using those lovely herbs that have been growing in the sunshine. They smell amazing.

We share our gardens with quite a lot of other creatures. We found some of them today. What do you think they are?

Exciting developments are going on in both our school gardens. Watch out for gardening opportunities coming up and come along and get involved.
