

Outdoor Learning Spring 3 2024

Feeling Beaky

What sort of beak would you need if you wanted to eat a worm? How about a seed or a nut? We tried out different tools with different types of food to see how birds manage with their beaks.

As part of the big schools Birdwatch, we've been trying to identify the birds around our schools. We can recognise a robin, a great tit and a blue tit. We were most excited to see a goldfinch and a buzzard.

As well as watching the birds, we've been getting creative, making them food and nests. we think we might have a blue tit nesting in one of our boxes at Shalfleet too.

As usual, we have been busy all around our gardens. We have been so busy building marble runs, obstacle courses, bug houses and so much more.. There are so many opportunities for working together, solving problems and trying new things.

Time outside is so precious, but you can see how we get so muddy! It's really important that we have the right clothes to keep us warm and dry outside. Don't forget to bring your waterproofs and wellies on your outdoor learning day. That way we keep the mud and not in the classroom.

Don't forget to join in with the Big Garden Birdwatch this weekend.
